

Guildford Cathedral Library Catalogue

The Library Catalogue is supplied in a Zip File containing four .PDF files:

1. Catalogue by Author.pdf
2. Catalogue by Title.pdf
3. Updates.pdf
4. Catalogue Notes.pdf - this file

If the first three files are unzipped into the same folder (directory) they will operate together to give access to the catalogue ordered by Author in alphabetic sequence, the catalogue ordered by title and the additions made since the first two files were produced. If you obtain a later version of the zip file then, provided that you un-zip the contents to the same directory (folder), the later versions will over-write the older versions as it is intended that the file names will not alter between releases.

The files are readable using Acrobat Reader and bookmarks are provided to aid navigation. It is worth noting that if you lose the Bookmarks in Acrobat then pressing F5 will restore them. Searching is possible using the normal facilities available in Acrobat.

The files have been tested using Acrobat Reader 5 and 6 operating under MS Windows 98SE, 2000 and XP (professional and Home). However the files are provided as they are and the Librarians can offer no technical support whatsoever.

The latest version of the files are always available from the Cathedral web-site where the date of the latest release is indicated.
